R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

When you click the \mathbf{Knit} button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
##
        speed
                         dist
##
           : 4.0
                           : 2.00
    Min.
                    Min.
##
    1st Qu.:12.0
                    1st Qu.: 26.00
##
    Median:15.0
                    Median : 36.00
           :15.4
                    Mean
                           : 42.98
    3rd Qu.:19.0
                    3rd Qu.: 56.00
##
           :25.0
                           :120.00
```

Including Plots

You can also embed plots, for example:

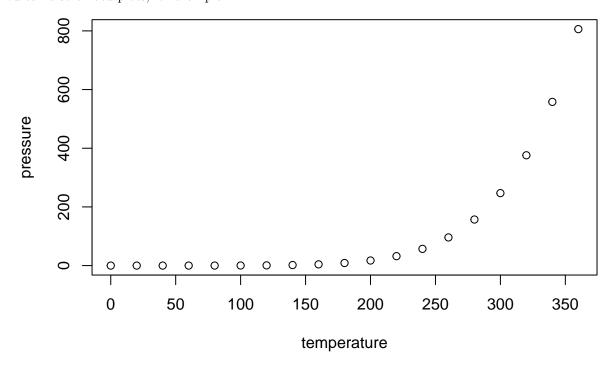

Figure 1: A plot of the tire pressure...?

Note that the $\mbox{\it echo}$ = FALSE parameter was added to the code chunk to prevent printing of the R code that generated the plot.

$$P(X_{n+1} = j \mid X_0 = i_0, \dots X_{n-1} = i_{n-1}, X_n = i_n)$$

= $P(X_{n+1} = j \mid X_n = i)$
